Sub: Order received for Rooftop Solar Panel Installation from well-known chain of school group having schools in Gujarat and Maharashtra.

Dear Sir,

This is to inform that Company had earlier informed that it has entered into B2C market for providing EPC solutions for installation of solar rooftop projects. Since Solar Power in India has a huge and untapped potential and with new introduction of NET METERING technology by almost all the states, Company is targeting the solar rooftop market.

Government is also encouraging this clean source of energy by providing subsidy and the latest announcement by the government for boosting domestic solar panel manufacturing package of 11000 CR is a big positive for this sector.

With reference to the above, we are proud to announce that the Company has received an order from well-known chain of school group having schools in Gujarat and Maharashtra for rooftop solar panel installation on their Schools. This installation of rooftop solar project, school would be saving approximately 30% of their power cost. Company is eyeing on this cost saving advantage as the big opening for the solar rooftop industry.

Thanking You.

Yours Truly,
For Veer Energy & Infrastructure Limited
